

## Security Earpieces

VestGuard offers an extensive range of earpieces providing clear, high quality, yet low profile, communications at work. Used by military organisations, security teams and police forces throughout the world, our mix and match range gives you the flexibility to meet your specific requirements. Options include: radio make and model compatibility, multiple push to talk (PTT) points, low profile sets and even Kevlar enforced wiring.

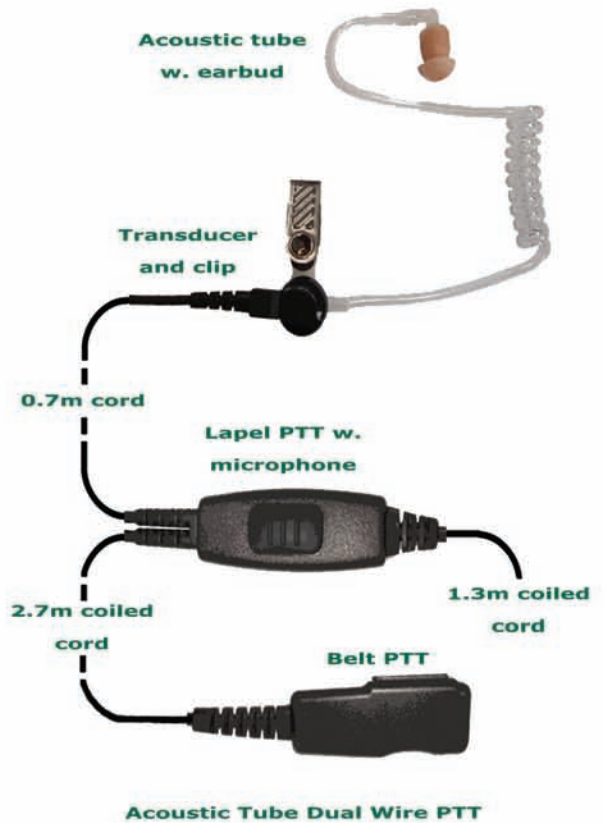

All earpieces are manufactured from surgical rubber and durable plastic and built to withstand and perform in the harshest environments. Coiled reinforced wiring means a flexible fit and a more robust solution that isn't easily damaged during a confrontation. This ensures communication is maintained when you need it most.

One or two way communication options are available with either listen only or push to talk microphones, which can be lapel mounted or throat microphones.

Both microphone options give improved clarity. The throat microphone cuts down the amount of background interference in high noise environments and offers the wearer a less conspicuous two way communication solution.

### Options

- o Several styles including wireless
- o Multiple PTT buttons
- o Listen only sets
- o Available to fit Nokia, Vertex Standard, Cobra, Maxon, Yaesu and many more radios.

# Police Earpieces

VestGuard offers an extensive range of earpieces for TETRA systems providing clear, high quality, yet low profile, communications at work. Used by police forces and public services in the UK, our mix and match range of earpieces gives you the flexibility to meet your specific requirements.

Options include: radio make and model compatibility, multiple Push To Talk (PTT) points, low profile sets and even Kevlar enforced wiring. Styles include; G shape, D shape, earbud, acoustic tube and headsets.

All earpieces are manufactured from surgical rubber and durable ABS and built to withstand and perform in the harshest environments. Coiled reinforced wiring means a flexible fit and a more robust solution that isn't easily damaged during a confrontation. This ensures communication is maintained when you need it most.

One or two way communication options are available with either listen only or push to talk microphones, which can be lapel mounted, throat microphones or speaker microphones.

All microphone options give improved clarity. The throat microphone cuts down the amount of background interference in high noise environments and offers the wearer a less conspicuous two way communication solution.
