

Ballistic Helmets

Our helmets are the next-generation in lightweight high-performance protection. Designed for both maximum comfort and protection incorporating state of the art ballistic composite technology in both construction and materials.

Helmets feature an improved harness system that not only increases comfort, balance and fatigue resistance, but also reduces the overall weight.

VestGuard offers a wide range of options to meet individual operational requirements, covering various; weights, sizes, colours and protection levels. Helmets can also be made to include ballistic and non-ballistic face shields.

Product Information and Testing

Design

Our helmets are manufactured using the latest specification aramid fibre, bound in a thermoplastic resin matrix. This process ensures a homogeneous, resilient structure ideally suited for ballistic applications.

We offer helmets designed specifically for the military, demining, riot policing and combat vehicle crews. Ballistic and non-ballistic face masks can be included as well as material covers to suit any environment. Helmets can also be fitted with mounts for optical equipment.

Comfort and Accessibility

Four point adjustable straps to adjust fit from 50cm to 59cm (medium) and 57cm to 64cm (large) head sizes. Leather comfort band on the brow and harness assembly to improve load distribution. Quick Release (QR) clip easily separates the system for emergency doffing and medical access to head.

Testing

All helmets are manufactured in the UK by VestGuard and are tested rigorously to ensure they comply with NIJ's exacting standards. Testing has certified these helmets offer the protection required by the American National Institute of Justice (NIJ) for NIJ Level helmets.

Protection Levels Available

NIJ Level II
NIJ Level IIIA 9mm
NIJ Level IIIA .44 Magnum

Our Guarantee

10 Year guarantee on ballistic helmets*
2 Year guarantee on materials and workmanship*
Maintenance contracts available*

Helmet Styles

PASGT Helmet

The most popular style of helmet, with over 20 years of service. VestGuard's development has improved the ballistic performance and comfort bringing the helmet firmly into the 21st century.

Special Forces Helmet

Based on the PASGT with a reduction in size and weight, available in 3 styles. The range allows complete compatibility with night vision and communication systems. MACH III pictured left.
